

FRESNO, CA - Citing much needed improvement to the City of Huron's Police Department facilities, Congressman Jim Costa announced today that the City of Huron will receive \$50,000 Community Facility Grant from the United States Department of Agriculture.

Costa noted, "The USDA'S Rural Development Community Facility Grant program is instrumental in providing assistance to rural communities across America." Community Facility Grants, he pointed out, provide funds to assist in the development of essential public facilities and services. These funds can be used to construct, enlarge, or improve community facilities for health care, public safety, and community and public services.

Funds received through this grant in the City of Huron will be used to enhance the current facilities and services of the Huron Police Department. "The Huron Police Department will be able to purchase needed vehicles and equipments, to repair their facilities and improve their services. All of which are vital in providing its community members with adequate service," Costa concluded.
